We are not powerless against climate change

Wetlands help us cope

Absorb & store carbon
Reduce floods

Relieve droughts
Reduce storm surges and protect coastlines

Stop the loss of wetlands!

Restore
Conserve
Use wisely

Don’t drain
Don’t build over
Don’t degrade

35% of the world’s wetlands have been lost since 1970. Together we must work to conserve and restore these amazing ecosystems, which help us prepare for, cope with and bounce back from the impacts of climate change.
